

# Triple Rinse

## Empty Pesticide Containers

---

Clean pesticide containers immediately after emptying them. Timely rinsing will be easier and more effective in removing all pesticide residues from the container.

### Step 1

Treat an unrinsed container as you would a full one - wear PPE according to the label.

### Step 2

Completely pour contents into spray tank and let it 'drip' for an additional 30 seconds.

### Step 3

Pour clean water into container and recap.

### Step 4

Shake container for 30 seconds and let it 'drip' for an additional 30 seconds.

### Step 5

Repeat Steps 3 & 4 two more times to complete the triple rinse.
